

CARLY'S MENU

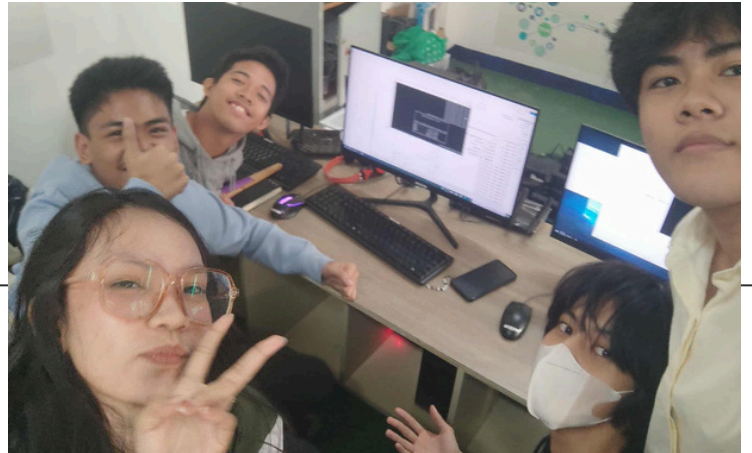

GROUP 2 DOCUMENTATION

CARLY'S MENU ON CONSOLE

This was the very first group activity that we had. The teacher challenged us with different instructions that we must do. We used Notepad and compiled it on Command Prompt. Our group were able to run the task and successfully made it on time. By doing this, we are able to have a vision of the menu that we will create in the future.

June 27, 2025

CARLY'S MENU ON JAVA NETBEANS

The 1st project we did "Carly's Menu", Carly's Menu is a simple Menu project, it was created using Java on Netbeans. On Aug 01 2025, we worked together and tweaked the code and logic of the given project.

August 1, 2025

CONTINUATION

This is a continuation of our work on the Carly menu on August 1st and now we have made many adjustments to our system and debugged errors in the codes and we have also finished the calculator for our menu and the buttons for our system.

August 4, 2025

DESIGNING

This August 5, 2025 is the day to design our Carly's menu buttons and background by uploading the pictures design. We modified some codes but encountered some bugs but we debugged it right away. We are almost done on our group project.

GROUP 2 DOCUMENTATION

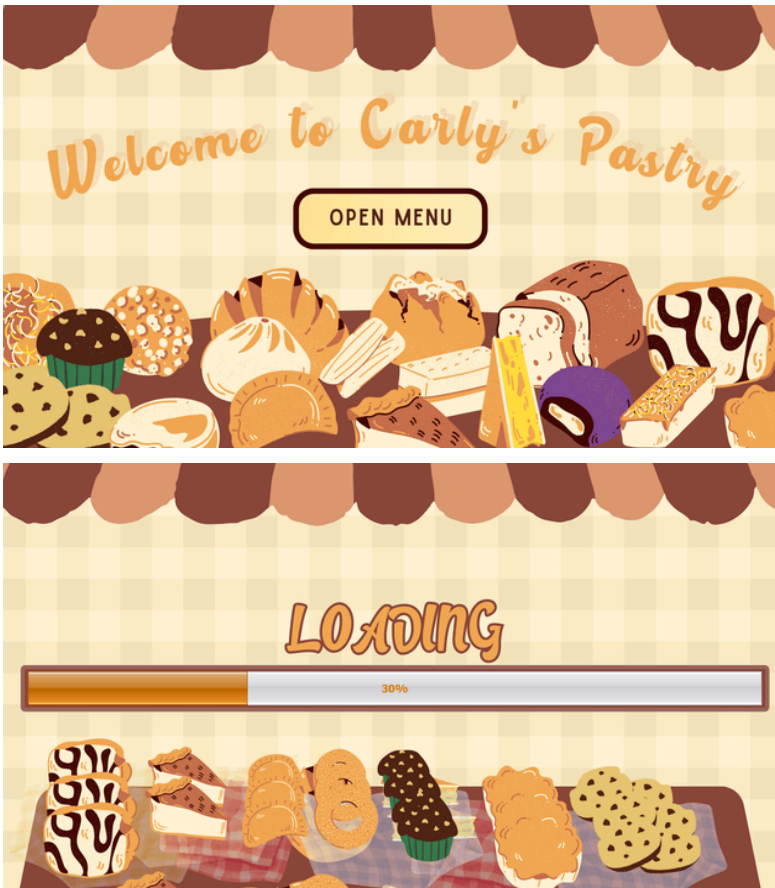

LOADING AND ORDER DELETE

Now we will create a loading screen for our Carly's menu, but creating the loading screen for our system was not easy. We are now asking Chat GP to help us make our work easier, and one of the things we are doing is fixing the coding for deleting customer orders

August 6, 2025

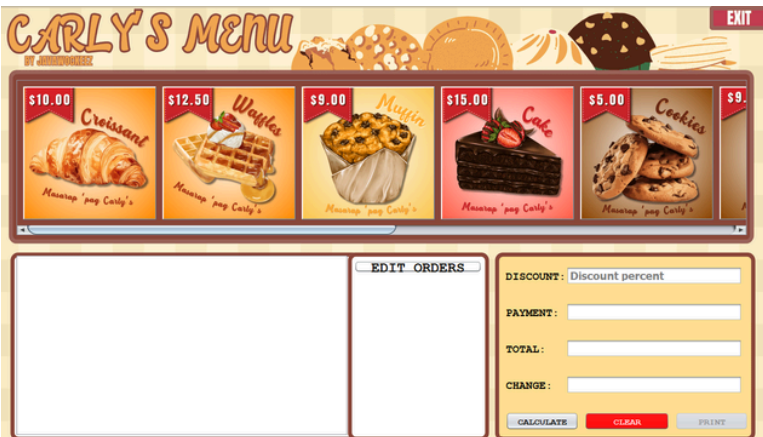

SCREENSHOTS

START AND LOADING PAGE

This page has a button that needs to be pressed to open the menu. After pressing it, a loading screen will appear with a percentage. The design of our dashboard is colorful and connected to our system.

MAIN DASHBOARD

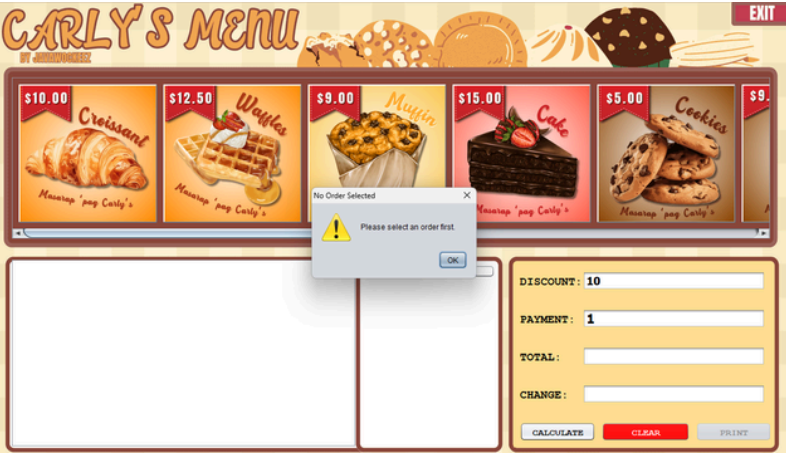

Our main menu has many buttons, first of all, the one for choosing the food the customer wants (Foods: Croissant, Waffles, Muffins, Cake, Cookies. And drinks such as Coffee, Frappe, etc.) it can be swiped to right to see all the items. Another button on our carly's menu is the calculate which calculates the customers' orders that shows a full receipt on the left box. After calculating the orders, it can be printed and saved in PDF. You can also edit you orders only before the user press the calculate button.

GROUP 2

DOCUMENTATION

CALCULATE BUTTON

If you press the calculator and there is no order placed, a notification will appear saying that there is nothing placed on the order.

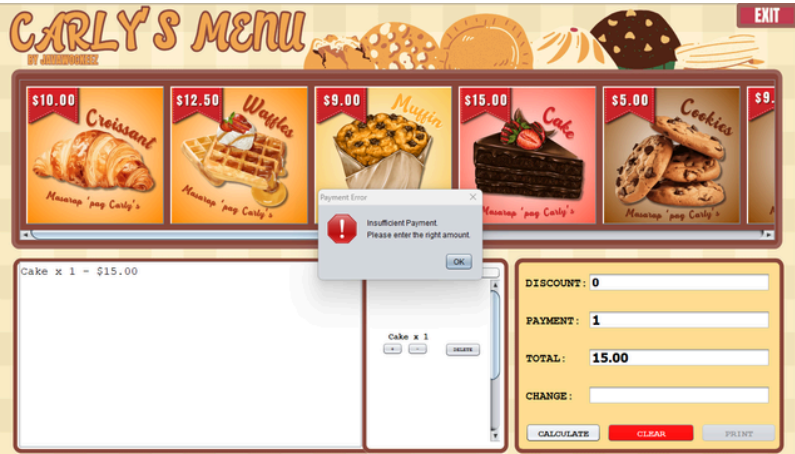

PRINT BUTTON

If the order and payment is successful, it will be calculated and a window will appear that where can print the receipt or download a pdf.

CALCULATE BUTTON ²

In the Carly's menu calculator, if you don't enter a right amount of money, there will be a notification to enter a right amount first before the user can proceed.

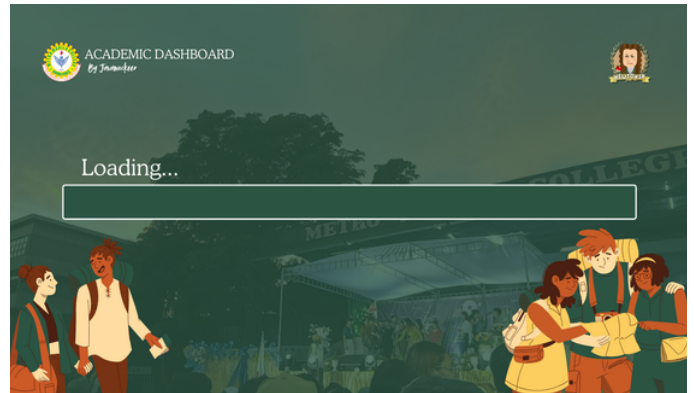

★ IPT GROUP 2 DOCUMENTATION ★

HOME

This is the first page of the whole IPT. First, you have to register so you'd have an account. Then, continue logging in.

After logging in, a loading will show first before proceeding to the main dashboard.

This is the first page of the IPT. There's a single button (Academic Dashboard) that once clicked, a branch of other buttons will appear (the subjects).

We only chose 3 out of 6 subjects because the others don't need their own dashboard. It can already be seen all throughout the dashboard since it was integrated already like MIL, Prog, and CPAR.

The design was inspired by a template on Canva and the designer chose a background taken originally by her (the MMC stage). And the image on the right shows a conversation of the two designers communicating through Canva texts.

✦ IPT

GROUP 2 DOCUMENTATION ✦

EARTH AND LIFE SCIENCE DASHBOARD

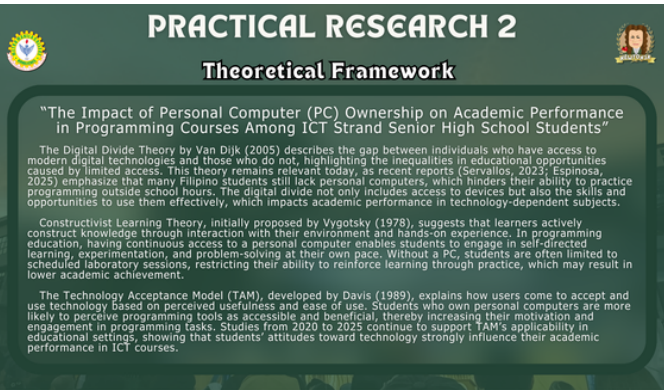

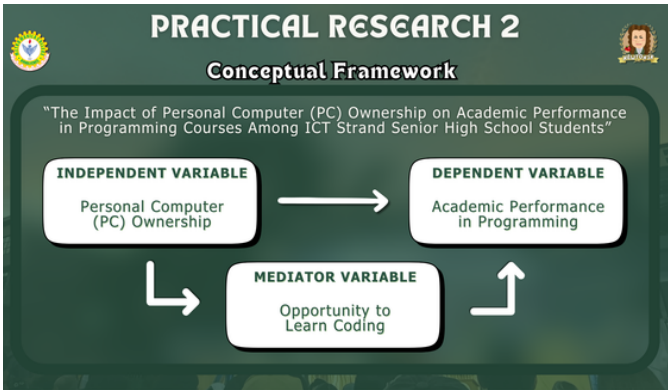

In the instructions, the group must create a visual video on how the solar system was formed that's why they decided to show the Nebular Theory. The video is entertaining as it used the group's own faces, as well as stickers, animations, and a voiceover with a little gen z humor but still sticking to the objective.

ENTREPRENEURSHIP DASHBOARD

This is the dashboard of the subject Entrepreneurship wherein the group must show the entrepreneurs' Filipino values when it comes to business/customers. The group decided to make it likely a comic by using a text balloons to show conversations but still realistic by taking pictures of our own.

PRACTICAL RESEARCH 2 DASHBOARD

In the Practical Research 2 dashboard, the group must decide whose research topic will be used and the member who was assigned to this subject decided to chose his own topic.

GROUP 2 DOCUMENTATION ✨

Our group was expected to be a "super team" but guess who passed their IPT in the last minute. In the first days of the week of making the IPT, we didn't start early since we still have some issues regarding the Charly's Menu. We debugged it to be able to submit. That week also have lots of deadlines with other subjects – we wouldn't be able to focus on the IPT. But this served as a lesson for our group. After that situation, we all learned our lesson and now ready to face more projects as a group.

GAME

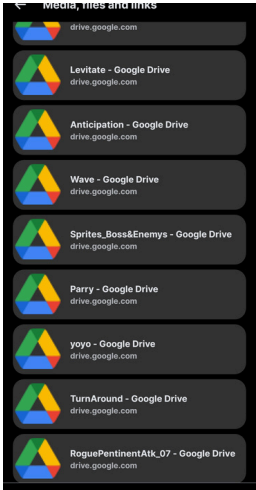

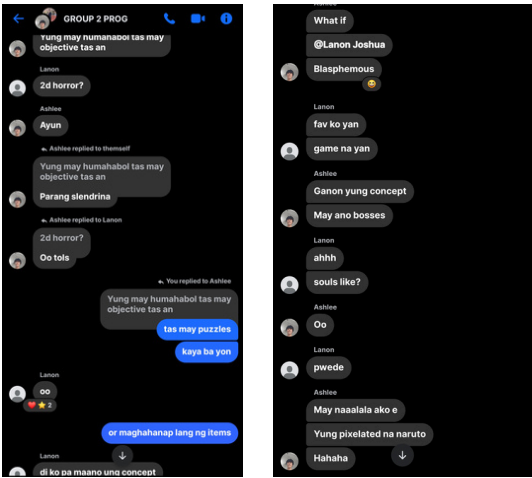

GROUP 2

DOCUMENTATION

BRAINSTORMING

August 24, Sunday, was the day we started brainstorming about what our game concept will be through chat. We were all suggesting and sending ideas from the internet. Lanon also gave us websites we could use to make the game.

August 24,2025

And in the next few days we worked at our houses and in our gc we talked about how our game would run and we helped each other with coding to speed up the work. We provided updates by sending gdrive to the gc so that we knew our updates on the game. We found a website that helped us create characters and designs for our game and there we looked for other designs that could be used.

UPDATES VIA GDRIVE

We used sprite that helped us create characters and designs for our game and there we looked for other designs that could be used.

SPRITE

CONTINUATION (F2F)

This is the day our programming teacher gave us time to work on our game in the Computer Lab to continue and finish our game. Our task today was to fix the codes and add characters to our game and improve the design.

September 29,2025

GROUP 2

DOCUMENTATION

FIX THE ERROR

This is the day of placing enemies and finding items and debugging coding problems in our game.

October 1,2025

DESIGN THE CHARACTER IN
SPRITE

What we did today was add our character skills, adjust the flow of our game, and fix minor problems in our game.

October 2,2025
